lengths are more exacting in selecting the material items which go to make up our vast stocks than would be necessary were our object nothing but profit. It would be easy indeed to slight a few of the hidden things in clothing making and to get the price of through and through worth for merely superficial worth.

But it has always been our rigid principle to insist upon quality a little better than it need be—quality such as is found in every seen and unseen part of our clothing at prices ranging from \$10 to \$25.

Our compensation we do not count in dollar marks alone, but rather in the good will of an appreciative and ever growing clientele.
